TKM. Xtreme Kit

TKM. Xtreme Kit is the first system in the world that can clone Megamos® Crypto (ID48) transponder car keys including Volkswagen, Audi, Volvo and more.

The extraordinary performance of the Keyline cloning devices make for an exceptional level of flexibility, that considerably expands their range of action cloning more than 200 models available to date: 884 Decryptor Mini with the latest generation Keyline Cloning Tool App and 884 Decryptor Ultegra with the powerful Keyline software.

TKM. Xtreme Kit is a software update that enables the cloning of all Megamos® Crypto transponders with TKM heads and with GKM glass chips. The cloning process can be started simply by inserting in your device the TKM. Xtreme electronic head, which can subsequently be reused as a standard new head.

Thanks to TKM. Xtreme Kit, now 884 Decryptor Mini and 884 Decryptor Ultegra can clone over 2000 car models: up to 90% of the cars, trucks and motorbikes from the past 20 years still in operation.

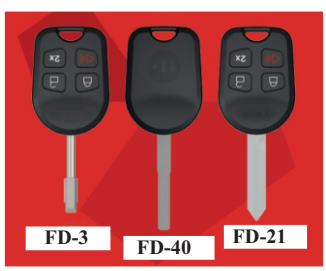
Integrated Ford Remote Keys

The range of keyline car remotes expands with the RFD100 and RFD80 models for Ford keys, presented to the world for the first time. Entirely on-board clonable, they guarantee perfect synchronization with the original ford remote without altering the functionality.

Keyline RFD100 keys have a plastic head with four buttons and an replaceable battery, and are available with three different key blades - FD3, FD21 And FD40 - for the duplication of remote functions for the duplication of ford models from 1998 onwards.

RFD80 - with the original Texas 80 bit integrated transponder, to be programmed with a diagnostic tool. remote functions can be easily programmed on-board.

BIRFD100-US-21
BIRFD100-US-40
BIRFD100-US-3 $112.00
BIRFD80-US-21
BIRFD80-US-40
BIRFD80-US-3 $108.00



***These keys work exclusively with the 884 and 884 Mini. Transponder key is cloned, then remote functions are done via on-board programming.**
