Patented Key Control

Protected by many international patents and strict, factory key control regulations, Mul-T-Lock®'s key control systems are designed to hinder unauthorized key duplication. Duplication of Mul-T-Lock® keys is only permissible at authorized service centers and on genuine Mul-t-lock key cutting machines.

Pick, Drill and Bump Resistance

Mul-T-Lock® products are designed to withstand various attempts at forced entry. Mul-T-Lock®'s unique telescopic pin tumbler mechanism will frustrate even the most experienced lock picker. Ten- and eight-pin cylinder designs enhance the level of security by requiring a dual shear line match in order for the cylinder to operate. plus, each cylinder incorporates hardened steel inserts in strategic areas to offer a high level of drill resistance. In addition, advanced protective elements such as mushroom and split plug pins, interlocking telescopic pins and strict key control procedures virtually eliminate the threat of bumping.

MTL™600

Advanced Key Control -
Through unique coded Mul-T-Lock key card, only readable by authorized Mul-T-Lock dealers.

Master Keying Options -
Supporting complex operational and organizational needs.
Choice of Format -
Cylinders, padlocks, locks, electronic door solutions and more - one key fits them all.

Increased Security Effectiveness -
Via patented High Security technology: keys and telescopic pins.

MTL™800

Fully backward compatible with the previous MT5®+
Supports large and complex master key systems.
Enablable the creation of exclusive keyways.
Integrates with wide range of products.
Offer a variety of keying options.
The same key cutting machines, the same tooling and the same pinning kit.

The patented platform combines protective elements to create a triple locking mechanism, superior key control, and extensive master-keying capabilities.

*Key blanks are drop shipped from the factory directly to the locksmith that bought in to the keyway
