Pair-Matched™ Hinge leaves manufactured together, machined together and anodized together, making select hinges fit your doors better and last longer.

Lifetime Lubrication
Eliminates the need for periodic maintenance. Quiet performance. Fights gear cap wear.

Anodized After Machining delivers superior wear, durability and life. Inhibits corrosion. Few hinge makers follow Select's lead in using this superior manufacturing process.

Meets LEED Requirements made from up to 100% recycled aluminum. Reduces environmental impact and qualifies for LEED points.

Patented 3-Hr. Fire Rating
Most select hinges are fire rated for 90 minutes. 3-hr fire rating, optional at extra cost, approved for positive/negative pressure. No fire pins or studs required. Patented design innovation.

Consistent Templating
Hole pattern is identical on both standard and heavy duty models, so select hinges line up precisely for easier and faster installation.

Coated Fasteners
Provide additional corrosion protection with either self-drilling, thread-forming (SDTF) or thread-forming (TF) screw.

Full Length Latch Protectors

Outswing. 1/8" maximum inset.
Standard barrel nuts accommodate 1-3/8" to 1-3/4" doors.
Long barrel nuts available for 2" to 2-1/4" doors.

Pre-drilled holes and included fasteners save valuable time.

Fasteners concealed on jamb side for added security.
