The KeySure Key Controller

Using the Keysure Keycontroller is an excellent way to keep track of keys and other items not regularly accessed or being held for emergencies.

The patented device is a simply operated, non-electronic, water resistant, keyless lockbox. once snapped shut, THE BOX MUST BE PHYSICALLY BROKEN IN ORDER TO GET TO THE CONTENTS. Each box has large labels for signatures and other identifying information. it's the only confidential, keyless lockbox that forms a security seal.

Tamper Proof Key Rings

Our Tamper-Proof Key Rings[®], made of solid and braided stainless steel, use a patented closing and sealing technique that allows you to use the whole ring to flip through your keys without them bumping up against a "raised seal" that does nothing to guarantee the security of your keys. Every ring comes engraved with a unique serial number for identification purposes.

Chit-Key Products

Chit-Vaults

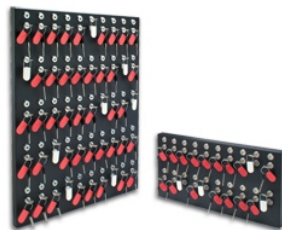

Our chit-key products use a very simple but clever technique for storing and ensuring the safe return of your keys. Locks are paired up to operate in tandem. You turn a user key in one lock to remove a control key from another lock. We offer two standard vaults, a one key position vault and a six key position vault.

CALL FOR MODELS AND PRICING

Chit Panels

The locks on our multi-chit panels are paired up in rows just like our chit vaults so you can track 20 and 50 keys at a time, respectively. These multi-chit panels are perfect for fleet customers who want to control a lot of keys at one time without going to an electronic storage cabinet

Security Asset Managers (SAMS)

Key Systems has put the power of web-based technology to work in its family of SAMS. customers can now use standard web browsers on any web-enabled device – to configure, operate and control access and assets from anywhere in the world. systems comprise a database, a web server, and an XML communications protocol. These combined technologies allow multiple (authorized) users to perform transactions remotely, and in real time, from anywhere with absolute security. Available in large and small formats.
