

## Accredited Lock Supply

Pemko Hinges consists of two full-height, paired and geared leaves. Each geared leaf rotates evenly from top to bottom riding on bearings. The geared leaves and bearings are held together by a full-length channel cap. This assembly retains the smooth, clean lines of the door and frame, while easily supporting heavy vertical loads. HD3 hinges are Grade 3 Heavy Duty, rated for up to 600 lbs. doors. HD1 hinges are Grade 1 Heavy Duty, up to 600 lbs. doors & 2.5 million door cycles.

### Full Surface Hinge

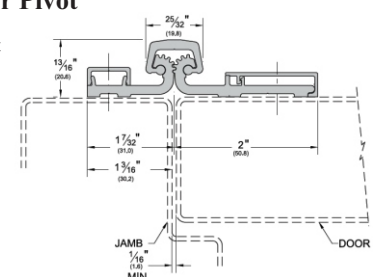

Full-surface units are designed mainly for retrofit work, and are applied to the exposed surface of the door and frame.
