Course Description
(Fee: $325)(8 NJ CEU)

This class is designed for the locksmith that has little to no familiarity with the locks used on Amsec and Gardall safes (electronic and mechanical). The ESL5, ESL10, ESL20, Securam Basic electronic locks and the Sargent and Greenleaf Group 2 mechanical lock they use, will be discussed. Explanations and photos of the components of the locks will be shown. The students will install a Mechanical Lock, Dial, and Ring on a lock mount in class. Programming of the different electronic locks will be covered. If time permits, methods of opening these locks on a locked safe will be discussed. As this is a one day class, there is not enough time for a comprehensive explanation/discussion on all the topics covered, but rather, this class provides a good introduction into each of the topics covered.

STUDENTS SHOULD BRING SCREWDRIVERS, PLIERS AND A HACKSAW OR DREMEL TO CUT THE SPINDLE OF THE DIAL.

FEE: $300 + $25 for Lock Mount/ Limited Seats

Check Payable to: Precision Lock and safe

Gardall PREMIUM QUALITY SAFES

AMERICAN SECURITY EST 1946
