MGPRO=Black SS=Stainless Steel

ECP simply stands for EasiCode Pro.
For conventional push button locks, to change the code can take anywhere from ten to thirty minutes.
This is because you firstly need to remove the keypad from the door and rearrange the internal tumblers.
This can lead to code change errors and damage to the spring control bar, proving costly and time consuming.
The new EasiCode Pro range from Borg eliminates the risk and allows you to change the code on the door in seconds.

There are just 4 steps:
#1. Press the code change button. For the BL2000 ECP and the BL5000 ECP style, this requires their respective code change key to do so.
#2. Enter the existing code
#3. Press the C button and enter your new code
#4 Release pressure on the code change button and press the C button

BL2701 ECP MG Pro – Marine grade, tubular latch, ECP keypad with key override & inside paddle handle with holdback

The BL2701MG series falls under our Marine Grade category of locks. With a specialized e-plating process and fully stainless steel internal parts.

The BL2701MG comes with a key override, as well a marine grade variant of our 2-3/8″ tubular dead-latch.

BNBL2701-ECP-MGPRO
$290.00

The BL4400 ECP series is our medium tier of marine grade, Easicode Pro locks. Designed for use on timber gates, this unit comes with fully marine grade, stainless steel fixings and specially e-plated marine grade material to survive arduous conditions.

BL4401 ECP – Marine grade, free turning lever handle ECP keypad, inside holdback lever handle & 2-3/8″ tubular latch

BNBL4401-ECP-MGPRO
$196.00

BL4441 ECP – Marine grade, back to back, free turning lever handle ECP keypads & 2-3/8″ tubular latch

BNBL4441-ECP-MGPRO
$282.00

BL4409 ECP – Marine grade, free turning lever ECP keypad, inside rim-fixed slam latch

BNBL4409-ECP-MGPRO
$182.00

The BL5000 ECP series represents a medium to heavy duty lock with a fully clutched, flat bar handle. This keypad comes with an optional free passage mode, allowing a bypass of the coding mechanism.

BL5401 ECP – Flat bar lever keypad with an internal lever handle, tubular latch & on the door code change function.
2-3/4”BS

BNBL5401-ECP-SS
$250.00

BL5701 ECP MG Pro – Marine Grade lever turn keypad with internal handle, built-in key override and tubular latch

BNBL5701-ECP-MGPRO
$391.00

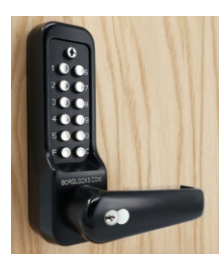
BNBL5701-ECP-SS
$332.00

BL5771 ECP MG Pro – Back to back marine grade keypads with key override and tubular latch, 2-3/4” BS

BNBL5771-ECP-MGPRO
$600.00

The BL7700 ECP models have a built-in key override in the lever/knob handle; SFIC prep, less core. This is a new type of key override system for Borg Locks, whereby rotation of the key engages the lever/knob handle, making it ideal for use with potentially heavily sprung third-party locks. The keypad lever/knob is free rotating and only engages with the clutch and 8mm spindle drive until the correct code of key is entered.

BNBL7701-ECP-MGPRO $405.00



Trim plates to cover an existing 2-1/8” hole sold separate:

BNBL-5000-CP-MGPRO (BLACK)	$20.00
BNBL-5000-CP-SS (STAINLESS STEEL)	$36.00
