Allegion invites you to attend a class on:

Schlage ND Series Servicing Cylindrical Lock

LK201

Would you like an in-depth look at cylindrical locks from a Schlage lock expert? This comprehensive, hands-on class covers the features, design, and operation of the Schlage ND Series. You will have the opportunity to assemble some of the most popular ND Series locks as well as correctly time the locks for proper operation. Attend this session and you will leave with expertise about this heavy-duty lock.

Course length: 1 day

Topics include:

- Common lock functions and applications
- How to assemble classroom, storeroom, and entrance/office function locks
- Installation procedures
- Electrified and electronic ND Series functions and features
- Maintenance, troubleshooting, and servicing tips

Upon completion of this course, you will be able to:

- Interpret lock function descriptions
- Identify parts for specific functions and explain how they provide the needed lock behaviors
- Install an ND lock in the industry standard 161 door prep
- Contrast the electrified and electronic ND locks
- Properly service and maintain ND Series locks
- Identify the root cause when a lock isn't operating as expected, and then fix the problem

Who should attend:
Institutional and commercial locksmiths, maintenance and facility personnel, or any one responsible for servicing commercial locks. Some experience in door hardware is recommended.

Continuing education credit: 1 point toward maintaining your ALOA certified status

NJ CEU Credit(s): Pending
