Control iD Access Control Training:

Join us for an informative, hands-on training session covering the Control iD iDFace, an advanced facial recognition access control solution designed for organizations of all sizes. Whether you're securing a small office, school, healthcare facility, commercial building, or a large enterprise, the iDFace provides a modern, scalable solution for secure access management.

During this training, attendees will learn:

- Access Control capabilities and system applications
- Control iD hardware overview
- Key product features and functionality
- Supported credential types
- Management software overview
- Control iD Access Wiring as well as connecting external devices (buttons, strikes, etc.)
- Programming via the device interface (including the holidays, schedules, departments, users, etc.)

By the end of this Level 1 class, you will understand the core functions of Control iD products, recognize basic wiring requirements, and feel comfortable performing the first steps needed to configure and commission a simple access control solution.

Who Should Attend?

- Locksmiths
- Security Integrators
- Low Voltage Contractors
- Access Control Technicians
- IT & Security Administrators
- Facility Managers

Gain practical knowledge, discover real-world applications, and learn how the Control iDFace can provide a secure, flexible, and user-friendly access control solution for virtually any facility.
