RCI YD30 & YG80 TRAINING

WITH

MATTHEW NYE-HINGSTON

RCI Product Specialist

Learn advanced features, installation techniques, and real-world applications of RCI's industry-leading electronic locking solutions.

In-depth training on the **RCI YD30 & YG80 Series.**

- Technical insights.
- Best practices.
- Real-world applications.

YD30 SERIES

RELIABLE. SECURE. CONVENIENT.

The YD30 series electronic locks are motor driven electronic locks that use a collapsing mechanism that is deadbolted when locked. It is designed to secure commercial single or double acting doors.

- Align a misaligned door
- Release when requested, even with excessive load on the door

The YD30 series gives the user the ability to control access in and around a facility and provide traffic reports when desired. It can also be used in a more straightforward system where controlling access to a single door can be implemented with a stand-alone RTE access system.

YG80 SERIES

HIGH-STRENGTH. WEATHERPROOF. BUILT FOR ANY ENVIRONMENT.

This high-strength lock is designed for securing gates, roll-up doors, shipping containers, and any other large door or entryway.

This impressive locking solution offers the ability to integrate into an access control system. Fully monitored, weatherproof, and user configurable, the RCI YG80 is the perfect indoor and outdoor locking solution.
